

REFERENCE

German Army Sport College, Warendorf / Germany

Application Field

- Wood preservation – preventive / controlling

Structure Type

- Stadiums / arenas / sport facilities

Brief Description

The sport college of the German Army was originally opened on February 5, 1957 in Sonthofen in the Allgäu region and remained there until it was relocated to Warendorf/Westphalia in 1978 on the former property of the Military Riding and Driving School. The corner stone of the new sport college was laid by the Minister of Defense at that time, Georg Leber, on November 15, 1974.

Main Problem and Requirements

The entire framework was infested with European house borer and was treated by a pressure injection method.

The roof structure was treated by a hot air method and then impregnated for preventive protection with Adolit Liquid Boron.

Client

Bundeswehr, Warendorf

Specifier

Nordmann GmbH
Schädlingsbekämpfung
